

What is communication?

A way to share information.

What is multimodal communication?

Using more than one way to communicate

Why do we use multimodal communication?

Not everyone:

- talks to communicate.
- talks all the time.
- talks enough to share all information.

Using more than one way to communicate can help us all to share information successfully.

All ways to communicate are equally valued!

Multimodal ways to communicate

No tech

- Body movements, vocalisations and speech, facial expressions, signing

Low tech

- Writing, communication boards or communication passports etc.

Tech

- Communication aids, texting.
